

### **Key Features**

- Compact Size
- Low insertion loss
- High channel Isolation
- High Extinction Ratio
- High stability and reliability

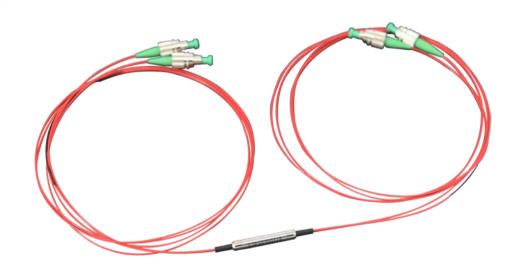

### **Applications**

- Fiber laser
- Fiber amplifier
- Fiber Sensor
- Communications
- Laboratory R&D

## 2050/1570nm Polarization Maintaining WDM/Tap Coupler/Isolator Hybrid Combination

DK Photonics' WDM/Tap Coupler/Isolator Hybrid Combination is a combination of a wavelength division multiplexer, tap coupler and an isolator in a compact package. All input and output fibers are polarization maintaining. This product has an extremely low insertion loss, a very stable tap-coupling ratio, high isolation, and high return loss. This product offers integrated solution to amplifier application by combining more functions into a very compact package.

## For more Info

Add.:

4F, Bldg. 18, Qinghu Industrial Park, Dahe Road, Longhua Dis., Shenzhen, China 518109

#### **Package Dimension**

 $\ast\,$  For forward pump, Tap is both axis working. For backward pump, Tap is fast axis blocked, slow axis

\*Due to ongoing design improvements, the package size is subject to change. Please contact DK Photonics for confirmation if you have special requirements.

| Max. Tensile Load                                   |                            | N    | 5                             |                           |  |  |
| Fiber Type  | Pump port                  | -    | PM1550 fibe                   | PM1550 fiber or specified |  |  |
|   | Common Signal and tap port | -    | PM1950 fibe                   | PM1950 fiber or specified |  |  |
| Operating Temperature                               |                            | °C   | -5 to                         | -5 to +70                 |  |  |
| Storage Temperature                                 |                            | °C   | -40 to                        | -40 to +85                |  |  |
| Package Dimensions                                  |                            | mm   | Ø5.5 x L38(<5W), 60x12x8(>5W) |                           |  |  |

- 1. Above specifications are for device without connector.
- 2. For devices with connectors, IL will be 0.3dB higher, RL will be 5dB lower and ER will be 2dB lower. The default connector key is aligned to slow axis. Power transmits through the connector less than 2W.
- 3. Type B: Both axis working, Type F: Fast axis blocked, the default is Type B if without request.
- 4. If there is pulse application, please be sure to inform us of pulse energy and peak power.
- 5. For forward pumping, Tap is both axis working, for backward pumping, signal output and Tap are both fast axis blocked, slow axis working. If you have questions about the axial direction, please contact us.

#### Order information P/N:PMWTIH-10-20-30-40-50-60-70-

When you inquire, please provide the correct P/N number according to our ordering information, and attach the appropriate description would be better. If need any connector, we do not recommend choosing a 250µm bare fiber pigtail.

Part Number Example: PMWTIH-5057-S-L-01-B-F-90-10-FA

**Description:** Polarization Maintaining WDM/Tap Coupler/Isolator Hybrid Combination, 2050nm signal/1570nm pump, single stage isolator, 1% tap, backward pump, fast axis blocked, slow axis working, with 0.9mm OD loose tube, 1.0m fiber length, and FC/APC connectors at all ports.

#### **Ordering Information for Custom Parts**

If you need to customize other specifications, please provide detailed description for your requirement.
